

TCX-3000 Thermal Camera System

Thermal Human Body Temperature Fast Scanning System with Face, Mask, Gender & Age Recognition System

Contactless fast scanning and prevent infection ...

From a distance of 1.5 meters, precise body temperature measurement ...

Personal such as face recognition, gender, age artificial intelligence that detects features ...

Detecting unmasked people and Light and audible warning feature ...

Social distance with people counting feature and customer limit control ...

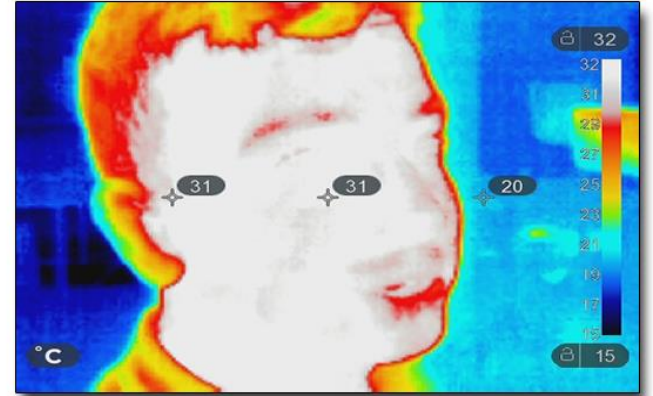

2nd control screen for security guards support ...

TCX-3000 Thermal Camera System

Resolution	160x120
Temperature Range	20C ~ 50C
Accuracy	<0.06C
CCD	5 Megapixels
Operating temperature	0C ~ 40C
Functions	Abnormal temperature alarm, automatic tracking, face recognition, unmasked control, people counting, gender and age detection, database, cloud connection, 2nd screen support ...
Interface	Turkish, English, العربية
Accessory	Thermal camera tablet camera, mounting bracket, Video output cable, Carrying Bag, Power Adapter.
Software	MXB Thermal Face recognition and body temperature measurement system software.
